

Aanpassing FIA reglement art 279 .10.2.2 met onmiddellijke ingang vanaf 10/03/2017

(belangrijk voor hen die willen deelnemen aan FIA wedstrijden)

Betreft: beglazing

Glazing

Windscreen

The windscreen must be of laminated glass or of a polycarbonate or PMMA ensuring the same transparency as the original glass.

If of polycarbonate or PMMA, the thickness must not be less than 4.75 mm.

Tinted glass screens are only permitted if they are original for this car.

Windscreens which are damaged to such an extent that visibility is seriously impaired or that there is a likelihood of their breaking further during the competition will be rejected.

The addition of a maximum of 6 protective transparent films on its external face is permitted.

Stickers and spraying are not allowed, except those authorised by the Sporting Code Article 15.7.

Side and rear windows

Glass must be replaced with polycarbonate or PMMA ensuring the same transparency as the original glass (minimum thickness 4.5 mm).

It must be possible for the side windows to be removed without the use of tools.

A sliding window in the side windows of the driver's and co-driver's doors must be fitted. The opening must be a minimum of 130 mm x 130 mm and a maximum of 150 mm x 150 mm.

The sliding windows must be closed at the start of the race.

A frame may be added to the door if it is originally frameless.
